

Local Weather Data

The Weather Station kit has been developed to provide Australian operations real-time weather monitoring data. This wireless sensor suite is a comprehensive weather station designed for outdoor environments, measuring:

- Wind Direction & Speed
- Temperature & Humidity
- Solar Radiation
- Rainfall & Rain Rate

myinsight.io by Powertec is your decision-making partner

Temperature, rainfall and humidity data can be used to improve irrigation and crop management, identify frost conditions, and alert to conditions that might impact animal welfare.

Highly accurate temperature, wind, UV, and rainfall readings

Fan aspirated radiation shield included

Included bird-deterrent spikes

Includes solar power kit and connectivity module

Quick installation

Improve decision making

Each Powertec kit can operate standalone or integrate with different sensors and networking requirements, providing flexible options to digitise your operation.

The myinsight.io system is revolutionising the way Australia does business.

myinsight.io is an IoT connectivity suite designed to provide near real-time environmental metrics through a centralised dashboard for day to day operations and management, trend analysis and exportation to third party reporting programs.

Build a clear picture of your entire operation with our suite of sensors and trackers including:

- Local Weather Data
- Rainfall Data
- Soil / Pasture Monitoring
- Delta T Station
- Asset Tracking
- Water Level Monitoring
- Fuel / Silo Level Monitoring

The possibilities are limitless.

Information is displayed on an interactive and easy-to-use online dashboard
