ANTENNAS | OMNI-291 SERIES

OMNI-DIRECTIONAL, MARINE & COASTAL LTE ANTENNA

450 - 2700 MHz, 7 dBi (Marine White)

Product Overview

The OMNI-291 is a high-performance marine antenna. This antenna uses a standard 1-inch (14 TPI) marine mount for simplified installation to most marine attachments. The ultra-wide frequency band covers all contemporary LTE operating frequencies with excellent balanced gain across all frequencies, including the LTE & CDMA 450 MHz bands which are common requirements for marine applications. Higher frequencies are not compromised, and the antenna design allows Poynting to have superior pattern control over the entire frequency range making the OMNI-291 a true high performance omni-directional antenna. The OMNI-291 guarantees signal reception almost everywhere along the coast, allowing it to be usable in all parts of the world. Poynting Antennas achieves this through new antenna configuration using multiple dipoles and a uniquely (patented) feed network. The antenna is future proof as it covers the 450 MHz LTE frequency getting more and more popular in various regions and countries!

Antenna Performance Plots

VSWR

Voltage Standing Wave Ratio (VSWR)*

VSWR is a measure of how efficiently radio-frequency power is transmitted from a power source, through a transmission line, into a load. In an ideal system, 100% of the energy is transmitted which corresponds to a VSWR of 1:1.

The OMNI-291 delivers superior performance across all bands with a VSWR of 2.5:1 or better across 90% of the bands.

*VSWR measured without a cable.

GAIN (EXCLUDING CABLE LOSS)

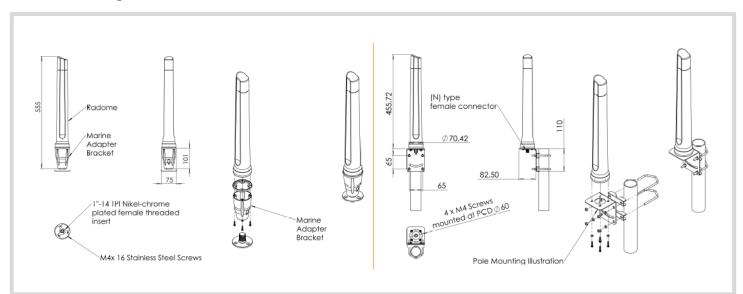

Gain⁺ in dBi

7 dBi is the peak gain across all bands from 450 - 2700 MHz

Gain @ 450 - 470 MHz:	2 dBi
Gain @ 698 - 960 MHz:	2.7 dBi
Gain @ 1427-1517 MHz	3.8 dBi
Gain @ 1710 – 2700 MHz:	7 dBi

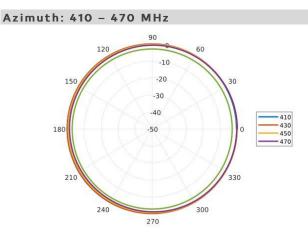

*Antenna gain measured with polarisation aligned standard antenna
