

New Product Release

AT3700B and AE3700B Antenna Range

20th November 2023

The new AE3700B and AT3700B matching pair of Cellular and UHF CB antennas have been designed to meet the needs of a range of customers including 4WD, agriculture, and heavy vehicle users.

These antennas are both ground-independent, lightweight, and have an overall length of 915mm making them perfect for either bracket or bull bar mounting. The antennas are fitted with a 4.5 metre coax cable that is pre-terminated with an SMA connection on the AT3700B and an FME connection on the AE3700B, making installation quick and simple.

The AT3700B covers the 690-960 / 1710-2170 / 2300-2700 / 3400-3800MHz bands, making it a true Multi-band cellular antenna that is 5G ready.

GME has a specialised design team with the ability to develop application specific antenna products. With a purpose-built facility based in Sydney, GME continues our ongoing commitment and dedication to local Australian manufacturing. Local manufacturing ensures GME can produce the highest quality communications equipment tailored to the harsh Australian landscape.
